

## <u>Carbon cycle Activity – Reflection questions</u>

Name four places carbon can be found on the planet
Think about the carbon cycle, what do you think has been your largest impact on the cycle? Is it from travel? Energy production and consumption? Farming practices? Discuss your choice and explain why according to you it i your greatest contribution to the disruption of the carbon cycle.
Where is most of carbon stored on the planet? How can we protect this place and ensure it can keep storing carbon?
What are some of the challenges of reducing our dependence on activities that affect the carbon cycle?
What can you do to reduce your impact on the carbon cycle?
